Polaris 9130: The real solution for no-compromise, onboard digital terrestrial television viewing.

Glomex, a dynamic company constantly engaged in the research and development of products aimed at making life onboard safer and more comfortable, presents Polaris – a new directive antenna for all your communication and entertainment needs. This new antenna offers the most highly advanced electric and electronic characteristics available and what's more it can be installed simply as an upgrade to your current system – the supports are the same as those used by Glomex over the last 20 years for receiving analogical terrestrial; the amplifier is even the same shape, but its functioning ability is far superior.

It is important to note that Polaris comes with two amplifiers – one internal and one external, both having low noise factor characteristics, or rather the capacity to reduce interference from other electromagnetic sources thereby improving sound quality. Moreover, the level of signal amplification is such that it can be installed in systems where you don't want to replace the preinstalled coaxial cable, in so far as it makes up for any insertion loss due to the age of the existing coaxial cable.

This new model has some very interesting and innovative technical characteristics, one of which is the presence of bypasses for both the amplifiers: coaxial relays which make it possible to obtain optimal reception signal management under any condition. This exclusive bypass solution, found only on Glomex antennas, is not only unique but is the only solution available today for the problem of receiver saturation by a too strong signal, a situation that makes TV viewing impossible.

Airwaves: the new way to keep in touch with our customers.

This is the first issue of a periodical newsletter dedicated to Glomex distributors. Together, we will try to improve communication and information regarding new Glomex products and well known ones. Our aim is to keep informing final users, allowing them to appreciate and choose "The Best in Marine Antennas".

GLOMEX NEWS

Paolo Liverani
Export Sales Manager

Dear
#azienda#

my name is Paolo Liverani, I recently joined the Glomex crew as export sales manager. I'm new in Glomex, but I come from nautical industry

Please send your queries using following e-mail:
pliverani@glomex.it I would be pleased to reply as soon as possible.

Wishing you a good work!

See you at METS

You're never alone on the water.

Glomex offers the best in marine antennas. And also it's the only manufacturer on the industry today offering you Lifetime Warranty. Where we manufacture our antennas in Italy there's a large culture on radio transmissions as Guglielmo Marconi invented the radio just 20 miles far from the Glomex plants.

We utilize this rich heritage and add the passion, like the other branches of the industry do in our vicinity, to make the best food, or the most appreciated performance cars in the world. Concentrating on the true needs of today's boater and developing a partnership like relationship with boat builders, Glomex is setting the standards for your most challenging communication and recreational requirements.

Only superior components are used in our antennas.

GLOMEX EVENTS

Glomex will exhibit at
METS Marine Equipment
Trade Show
Amsterdam
from 14th to 16th of
November on the
HALL 1/EUROPAHALL -
stand n. 01.213.

GLOMEX NEXT EVENTS

On vous attend au **Salon Nautique de Paris HALL 2.1 Electronique - STAND b.20**
