**In this issue:**

- **New range of omnidirectional TV antennas**  
*Glomex expanding its already known and large range of TV antennas introducing **VEGA** and **ALTAIR***
- **Focus ON: Reya International**  
*The French distributor since 1997*
- **Paris Boat Show**  
*Glomex will expose its products through its distributor **Reya International***

**NEW RANGE OF OMNIDIRECTIONAL TV ANTENNAS**

**Glomex** expanding its already known and large range of TV antennas introducing **VEGA** and **ALTAIR**, two omnidirectional antennas with innovative design, small size and high performance.

When you require a compact antenna, or want that sleek low profile look without the bulky weight of a large antenna, then the **VEGA** TV antenna mod. V9114 is the perfect solution.

Made from ASA, it can withstand the harsh marine environment, and with a totally screened, low noise amplifier built in the antenna case, it ensures you receive the best reception possible for VHF and UHF frequencies in both analogue and digital domains.

To balance the appearance on your boat you can match it with the RA121 Low Profile VHF antenna.

This compact Glomex **ALTAIR** TV antenna provides optimum omni-directional performance with both horizontal and vertical polarised signals, thanks to the extended height of the radome which allows for the inclusion of a vertical element inside.

Made from **ASA** to withstand the harsh marine environment, the V9126 can receive both VHF and VHF TV frequencies in both analogue and digital domains. It is supplied with a totally screened amplifier 12/24 volt d.c. equipped with a signal by pass and gain control to ensure the best possible reception of digital terrestrial signals.

To balance the appearance on your boat you can match it with the RA124 VHF antenna.

**VENUS:  
 the smallest Glomex satellite  
 Tv antenna**

The **Venus** has a **39 cm** dish and 1 decoder output making it the best choice for those who want a **small** and **simple solution** without **performance** compromise. The software is user upgradeable as well which culminates in it being possibly the best value Antenna on the market.

**:: FOCUS ON ::**

A Success Story

From humble beginnings in **1928** as a repair shop for yachts pulling into the port of Cannes, to our modern day position as the biggest distributor of marine electrical equipment in France and a manufacturer of high quality products, **Reya's** story is one of expansion, customer care and service, but above all, a commitment to develop and provide products of outstanding quality.

**REYA** prides itself on being a customer-orientated company and in recognizing the importance of reliable, quality, after sales service, has a team dedicated to solving problems - on customer site - as they arise. In line with the ever-developing profile of our customers, our 40 person strong international team is comprised of numerous nationalities. Our 4,500mq site is 30km from Nice Côte d'Azur International Airport allowing easy and prompt access to all international markets.

The **business cooperation** from Reya and Glomex started in **2006** and the Reya also take care of the service on the Glomex antennas sold through its network.
