

Glomex Newsletter - 01.2009

you are never alone on the water

**.:GLOMEX POINT OF VIEW.:**

**Hello to everybody**

The winter sky season here in Italy has been fully booked everywhere in the country despite of the reduction of consumption caused by the world financial crisis, we hope the same situation for the nautical season here in the northern hemisphere.

The sun is finally back after a strong winter and here in Italy we are seeing 20°C and more during the day.

We hope the good weather will last so we can sail for an early cruise at Easter or even before!

**Enjoy the sea and the sun!**

**RA104: BUILT IN TWO WAY SWIVEL RATCHET MOUNT AND PLUG-N-PLAY GLOMEX ANTENNA!**

**Glomex** introduces **RA104**, a new VHF antenna, built in two swivel ratchet mount and plug-n-play! RA104 is the perfect solution for the small mid sizes vessel, having a premium, quality looking product is just as important as its performance.

With choices such as plastic or polished stainless steel, **integrated 2 way swivel mount**, double thickness antenna mount tube, it not only can be matched to the look of your vessel, but it also can resist vibrations and shocks better than any other marine antenna. On top of that, with its glossy 5 layer UV resistant paint it will continue to look good for a long time into the future.

And not letting actual performance suffer, we top it off with 4.5 mts of twin screen low loss RG58 coaxial cable feeding the internal 1/2 wave antenna element which assures the best communication possible due to the resulting extended angle of transmission on the horizontal plane.

For more information, [visit the Glomex website.](#)

**RA 201**

With the **new RA201 splitter** it is possible to use just one VHF antenna to simultaneously receive the AM/FM and AIS radio signals; furthermore, the VHF transceiver can also be used. It is a compact component, easy to install in any place, requiring only a 12V power supply, from which a maximum of 25 mA is drawn, a negligible current draw.
